Date: July 31, 2017

NOTICE

Dear Students,

MIT Manipal has initiated the process of revising the B. Tech. Curriculum in May 2017. As a part of the ongoing process, we have planned an event called "Curriculum Conclave" where we would like to gather the inputs and feedback from the key stake holders on B. Tech. Curriculum. A daylong event will be held stream wise on two days; one on **26 August** (for Mechanical, Civil and Chemical streams) and the other on **23 September 2017** (for Branches of Computer and electrical streams), where, students, faculty and experts from industry and academia will share their views and suggestions.

For students of **III and IV year** we would like to give an opportunity to exhibit their creativity and to take part in this important academic activity by way of oral and poster presentations.

We have chosen two themes for the above activity:

1. *"My dream Curriculum"*
2. *"Creditizing experiential learning through Major student projects"*

This is a group activity, with group size limited to 5. Interested students from the respective stream are therefore invited to send their abstracts within 350 words clearly describing the concept to etc.mit@manipal.edu so as to reach on or before **August 10, 2017**. However for the second theme looking at the nature of the project groups the groups can be interdisciplinary. A team of judges will select the abstracts for Oral presentation / Poster presentation depending on the quality and relevance.

While sending the abstract please mention in the subject line the name of the respective theme and also indicate clearly along with the abstract the **Name, Reg No, Branch & Semester and e-mail ID** of the members of the group.

(For any queries, please contact Dr. Gicy M Kovoov, Associate Director (Academics) / Prof. S.N.Bhat Coordinator, Education Technology Cell, AB-5, first floor. MIT Manipal)
